

## Pronunciation

B C D F G H J L M N P R S T V W Y

C = /k/ (cake) · H = /h/ or soft rasp · J = /dʒ/ (jello) · R = /r/ flap (American butter)

Vowels: A /ɑ/ (father) · E /ɛ/ (cellar) · I /i/ (creek) · O /ɔ/ (door) · U /u/ (flu)

E and O closed like Spanish are fine too.

Stress: penultimate syllable — iLlru

## 1. Pronouns and Possession

|     | singular            | plural         |
|-----|---------------------|----------------|
| 1st | nim I               | nima we        |
| 2nd | run you             | runa you (pl)  |
| 3rd | hay he / she / they | haya they (pl) |

Pronouns are often dropped when context is clear. Affirmative sentences default to nim, and questions to run, so you don't repeat them as much as in English.

Possessive: pronoun before the word · for nouns, use de

nim bo = my house

bo de miwo = dog's house

## 2. The Four Core Markers

a [subject] · i [verb] · e [direct object] · u [indirect object]

Mnemonics: Actor · Initiates · Engaged · Unto

a nim i anona e mocen u run

I give chocolate to you

More often (nim dropped in affirmative): i anona e mocen u run

You may drop markers when context is clear. a drops the easiest, and then e.

a...a means is / are:

a hay a yalen = he/she/they is tall · a bo a yamirli = the house is old

Word order is flexible because roles are marked: e mocen u run i anona is also common.

## 3. Describing Words

A modifier goes right before the word it describes.

mocen mouje = chocolate drink

pohem mocen mouje = hot chocolate drink

## 4. Two Core Prepositions

en = location / time ("in, on, at")

de = source / possession ("of, from")

a run en bo = you are at home

a hay i anifi de bo = he/she/they comes from the house

## 5. Coordination and Contrast

|     |               |                                |                             |
|-----|---------------|--------------------------------|-----------------------------|
| su  | and / with    | run i mo e moaria su mocen     | you eat apple and chocolate |
| mai | but           | hay i anvu, mai nim i doum     | she goes, but I don't       |
| dou | or            | nim i mo e moaria dou mocen    | I eat apple or chocolate    |
| eta | so, therefore | a nim a tou, eta nim i bonfene | I'm tired, so I lie down    |

## 6. Negation

Add -um to the word you want to negate.

i dami a moaria = there is an apple

i damium a moaria = there is no apple

## 7. Questions and "what/that" Clauses

Raise intonation for yes/no questions. No structural change.

run i mo? = are you eating?

ce = what (question) · ca = that / which (connector)

ce en bo? = what's in the house?

Build more question words with ce + a domain word:

| word  | meaning              |
|-------|----------------------|
| cei   | who (what + person)  |
| cedom | where (what + place) |
| celi  | when (what + time)   |
| ceora | why (what + reason)  |
| cenon | how (what + way)     |

In statements, swap ce → ca: ceora → caora (because) · cedom → cadom (where) · etc.

run i ilianum cadom bo = you know-not where the house

## 8. Verb Stacking

To chain two verbs, repeat i before each one. No "to" needed.

run i dairan i anelem en bo = you like to stay home

hay i do i mo = he/she/they can eat

haya i dai i anvu = they want to go

## 9. Compounds

-a suffix bonds modifiers and noun into a single concept:

|             |                             |            |
|-------------|-----------------------------|------------|
| waa jasru   | waa (sea) + jasru (bend)    | = bay      |
| lufua bei   | lufua (air) + bei (vehicle) | = airplane |
| yalgaia mus | yalgaia (small) + mus (bug) | = ant      |
| waa dom     | waa (sea) + dom (land)      | = island   |

Hyphenated forms fuse two words into one expression:

|             |                             |                    |
|-------------|-----------------------------|--------------------|
| falen-li    | falen (child) + li (time)   | = childhood        |
| tohpu-vanvu | tohpu (sad) + vanvu (walk)  | = to trudge        |
| bo-bortal   | bo (house) + bortal (enter) | = to enter a house |

If you're unsure which form to use, just use whatever feels right. Chances are, either works!

## 10. Vocabulary

Most Oravia words are formed as (sub)cluster + root. A cluster is the first sound(s) and signals the semantic domain; a root adds a second layer of meaning.

moalen (banana) = MO (food) + A (fruit subcluster) + LEN (root: long)

~260 (sub)clusters and roots were discovered using word-embeddings. Once you know the patterns, you can make educated guesses and learn words faster.

## Starter Vocabulary

|        |            |         |             |        |              |        |          |
|--------|------------|---------|-------------|--------|--------------|--------|----------|
| mo     | eat / food | bo      | house       | beivu  | car          | leirih | tree     |
| falen  | child      | fare    | parent      | faejor | woman        | faejal | man      |
| faibor | spouse     | eofa    | friend      | elihei | person       | anye   | make, do |
